

PRODUCT DATA SHEET

Adaptor Kits

Description

Lubrigard adaptor kits simplify and streamline lubrication management. Whether you're topping up oils, transferring lubricants from drums or IBCs, or connecting to our offline filtration systems, these kits make every lubrication task easier and more efficient.

Benefits of using our adaptors

- Adaptors create a 'closed-lube' system, connecting your lube room to the asset
- Adaptor kits allow for the seamless connection of supplementary filtration systems
- Quick connector configurations ensure the right oil type is connected to the right asset, making precision lubrication programs more efficient
- Adaptor kits reduce wastage by maximising oil extraction from drums and IBCs
- Adaptor kits help maintain oil cleanliness during transfers, ensuring your oil remains clean and dry when needed
- Adaptors are customisable and can accommodate the following accessories:
 - Flat-faced quick connectors
 - Bull's-eye inspection glasses
 - Sampling valves
 - Acrylic oil levels gauges
 - Non-desiccant breathers
 - Disposable desiccant breathers
 - Serviceable desiccant breathers
 - Vacuum indicators

Adaptor options

- 210Ltr drum adaptors
- IBC adaptor kits
- Hydraulic powerpack adaptors
- AB and AD gearbox adaptors
