

Description

Used primarily on curbside pumps, Lubrigard's diesel filter is a vital part of our FLAC fuel strategy, where meeting strict cleanliness codes is essential. Equipped with a visual service indicator and high-performance glass fibre media, it offers excellent dirt-holding capacity - ensuring consistent, reliable filtration in demanding diesel applications.

Filter specifications	
Max operating pressure	16bar
Bypass pressure	5bar
Material of filter head	Aluminium
Material of spin-on filter	Steel
Porting	1 1/2" BSP

Element specifications	
Efficiency	$\beta \times(c) = 200$
DHC	119 grams (MTD)
Recommended flow	95 lpm

Filter part no.	Element part no.
10LBGFHVWGF-300	0501LBGHVGF-300

Filter series	Filter media	Filtration efficiency	Micron rating	Max flow	Seal
300	Glass fibre	$\beta \times(c) = 200$	01µm 05µm	110 lpm	NBR - Perbunan
